🔗 [Sharvajan03](#)

I am a Computer Systems and Networking Engineering student at SLIIT, working as a Security and Network Engineer with hands-on experience in network configuration and security. Skilled in technologies like SASE, SD-WAN, and FortiClient, I am now focused on expanding my expertise into system administration and cloud computing to build a versatile IT career.

Experience

Associate Network and Security Engineer

2024 - present

DMS Electronics (Pvt) Limited.

207/1, Dharmapala Mawatha, Colombo 00700.

- Configured and managed HPE/Aruba switches, Access Points, Citrix load balancers (VPX, MPX, SDX), and FortiGate firewalls, Sophos firewalls, and Huawei switches (Cloud Engine, Ekit, Air Engine, iMaster)
- Performed advanced configurations: SASE, SD-WAN, and FortiClient on FortiGate firewalls.
- Set up and optimized Aruba Access Points for reliable wireless connectivity.
- Configured network features: SSH, DHCP, VLANs, Inter-VLAN routing, ACLs, and port security.
- Troubleshoot and optimized networks for peak performance.
- Provided consulting on HPE/Aruba products to meet customer needs.
- Managed warranty replacements and firmware updates.
- Worked with Comware 5/7, Provision, and Aruba CX OS.
- config Huawei iMaster, VRP Configurations, IStack, AP Mesh, STelnet, M-LAG, CSS

Education

Sri Lanka Institute of Information Technology(SLIIT)

2022 - 2026

- BSc (Hons) in Information Technology Specializing in Computer Systems & Network Engineering
- CGPA: 3.02 (year4 semester 2)

BT/Methodist Central College Batticaloa

- G.C.E (Advanced Level) in physical science.

2018 - 2021

- G.C.E Ordinary Level.

2011 - 2018

Skills

- AWS Cloud Practitioner Essentials
- CCNA(Routing,IPV4,OSPF,SNMP,Wireless)
- Comware5/7,Aruba CX OS,Provision
- Fortinet Firewall(SD WAN, FortiClient, SASE)
- Red Hat
(Fundamentals of Red Hat Enterprise Linux)

- DevOps (Basic)
- Linux (CENT OS,FEDORA,UBUNTU,Rocky linux)
- C,C++,JAVA Programming
- ORACLE 12C Database , MY SQL
- HPE Network, Aruba Networks (vsx,vsf,irf)
- Docker
- Aruba Wireless

Skills

- Microsoft Office(word,power point,excel)
- DHCP, DNS, HTTPS, FTP,SSH,SNMP,ZABBIX
- Embedded C programming
- vmware
- bash script
- HUAWEI (iMaster NCE)

- Nagios Monitoring tools
- Zabbix
- Aruba ClearPass, Aruba AirWave
- Network Socket programming
- Git, Github
- citrix SDX NET SCALER (MPX,VPX,SDX)
- HCIA-DataCom

projects

University Core Switch Migration with Huawei S8700-6

2026

Led the core network migration for a university by replacing legacy Cisco Catalyst 5000 series switches with Huawei S8700-6 core switches. Converted and adapted existing Cisco configurations to the Huawei VRP platform, ensuring service continuity and minimal downtime. Designed and implemented a high-availability architecture using CSS (Cluster Switch System) stacking for redundancy and scalability. Configured Policy-Based Routing (PBR), advanced ACL policies, and Rapid Spanning Tree Protocol (RSTP) to optimize traffic flow, enhance security, and prevent Layer 2 loops. Successfully planned, tested, and executed the migration in a live campus environment, improving overall network performance and resilience.

Hospital Core Network Upgrade – Aruba CX 8100 VSX Deployment

2026

- core network upgrade for a hospital environment by replacing legacy HPE 5500 Comware switches with redundant Aruba CX 8100 switches deployed in a VSX pair architecture. Designed and implemented a high-availability solution using VSX synchronization, Active Gateway configuration, and Inter-Switch Links (ISL) to ensure seamless failover. Configured Multi-Chassis LAG (MC-LAG) for resilient connectivity and load balancing to distribution switches. Implemented Policy-Based Routing (PBR), advanced Layer 3 routing, and extended ACLs to enhance traffic control, segmentation, and security. Managed end-to-end migration including planning, configuration, testing, and production cutover, significantly improving network resiliency and performance in a critical healthcare environment.

Network Project using iMaster

Associate Network Engineer – DMSE 2025

- Provided technical support for a large Enterprise network deployment using Huawei switches and access points, fully managed via iMaster NCE Cloud.
- Assisted in configuring guest Wi-Fi with token-based access and integrated a local RADIUS server for secure employee SSID authentication using Huawei iMaster NCE.
- Supported point-to-point mesh bridging between access points using Huawei iMaster NCE, with one AP configured as MPP (Mesh Portal Point) and the other as MP (Mesh Point) to ensure seamless wireless connectivity across the Enterprise.

Disaster Recovery Site Switch Configuration– 8x Aruba CX 6300M- (DMS ELECTRONICS)

2025

- Designed and implemented a disaster recovery (DR) site network using 8 Aruba CX 6300M switches.
- Configured VSF stacking in a ring topology with four stacks, each containing two switches for redundancy and high availability.
- Set up VLANs, Layer 3 LACP, and Layer 2 LACP to optimize network performance and traffic distribution.
- Upgraded firmware, assigned IP interfaces on core switches, and implemented ACLs for enhanced security and traffic control.
- Configured STP, BPDU, SNMP, and other network protocols on all switches to ensure smooth operations and real-time monitoring.

projects

Enterprise Network Design & Implementation Project

(DMS ELECTRONICS) 2024

- Designed and implemented a spine-and-leaf architecture to increase bandwidth and ensure redundancy.
- Configured 2 HPE 5520 core switches with IRF stacking for high availability.
- Deployed 4 HPE 1920s distribution switches and 35 HPE 1920s OfficeConnect access switches.
- Installed 30 Aruba 505 APs and configured an AP cluster with a captive portal.
- Integrated a RADIUS server on the core switch for authentication.
- Configured VLANs, ACLs, LACP, and firmware upgrades for all switches.
- Implemented FortiGate 80F with SD-WAN rules, firewall policies, and DMZ setup.
- Configured mirror ports on core switches and SNMP for network monitoring.
- Integrated Zabbix for real-time monitoring and performance tracking.

Centralized Network Monitoring with Zabbix on Ubuntu server (DMS ELECTRONICS) 2024

- Deployed and configured Zabbix on Ubuntu Server for centralized monitoring.
- Integrated HPE OfficeConnect 1920s and Aruba CX 6200 switches using SNMP v2 for device monitoring.
- Configured monitoring templates to track switch performance, port utilization, and availability.
- Implemented automated alerting for proactive fault detection and rapid troubleshooting.
- Improved overall network visibility and operational efficiency through centralized monitoring.

Hospital Network Monitoring Project – Zabbix with HPE Switches

2024

- Deployed Zabbix server on Ubuntu to monitor hospital network infrastructure.
- Configured HPE switches (1920S, 5510, 5520) with SNMP for centralized monitoring.
- Integrated switches into Zabbix dashboard to track CPU, memory, uptime, and interfaces.
- Verified connectivity and SNMP configuration using CLI tools (snmpwalk).
- Planned enhancements including SNMPv3, switch stacking (IRF), and automated alerts for critical failures.

Certification

HCIA- DataCom Certified by Huawei (2025-2028)

CCNA: Introduction to Networks certified by Cisco

CCNA: Switching, Routing, and Wireless Essentials

AWS Cloud Technical Essentials by AWS

Fundamentals of Red Hat Enterprise Linux by coursera

Fortinet Certified Associate by Fortinet

Accredited SD-WAN Professional Assessment (AASP) by HPE

Aruba Product Specialist - Assessment (Central)
